

Guide: How to import KMZ files to Google Maps

Step 1: Open Google My Maps

- Open a web browser and navigate to [Google My Maps](https://www.google.com/maps);
- Sign in using your Google account if you're not already signed in.

Step 2: Create a new map

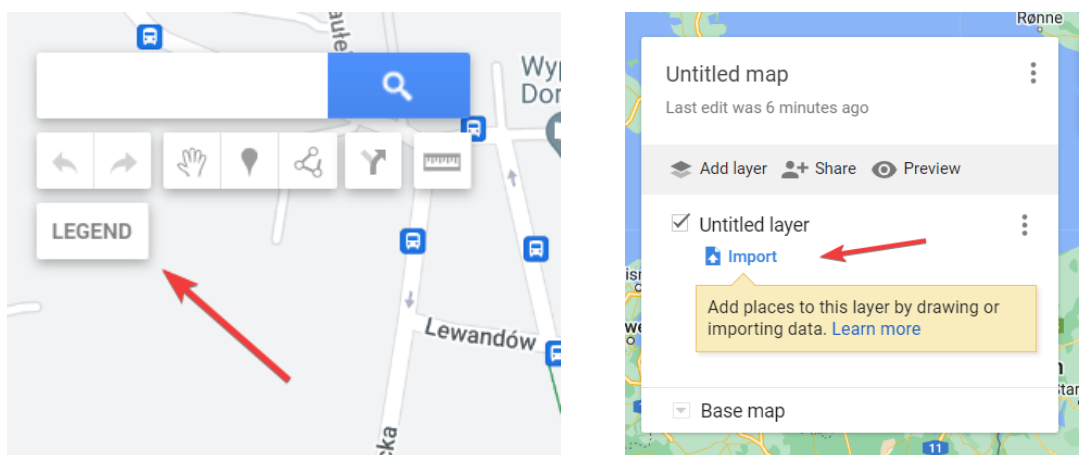

- To create a new map, click on Create a new map;

- Proceed with 'Create' in opened dialog.

Step 3: Import the KMZ file

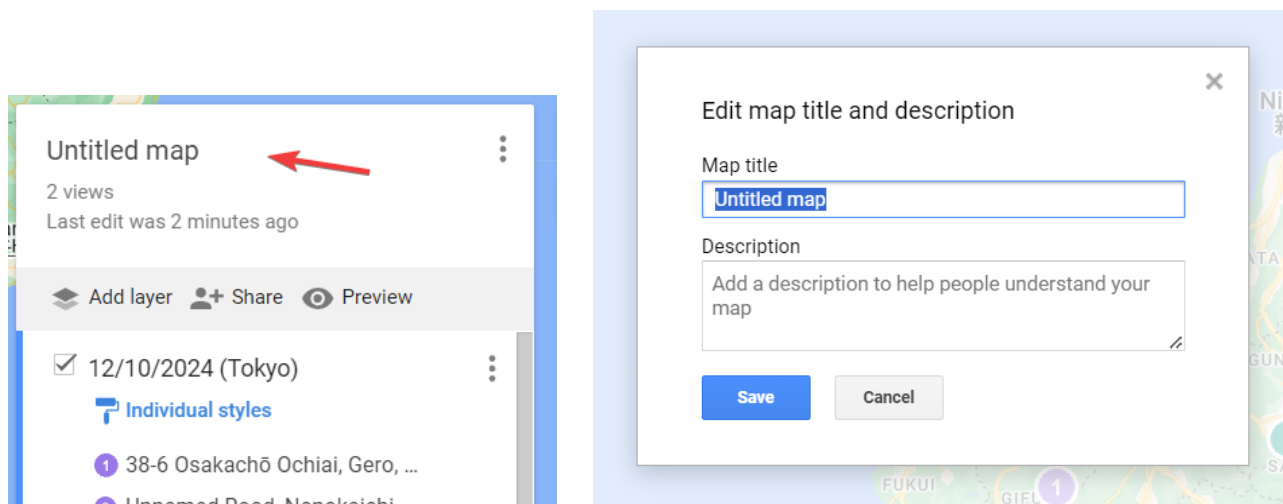

- In the map window, look for the 'Untitled layer' box on the left panel;
- Click on 'Import' (on mobile, you'll also need to click on 'Legend');

- Select your KMZ file.

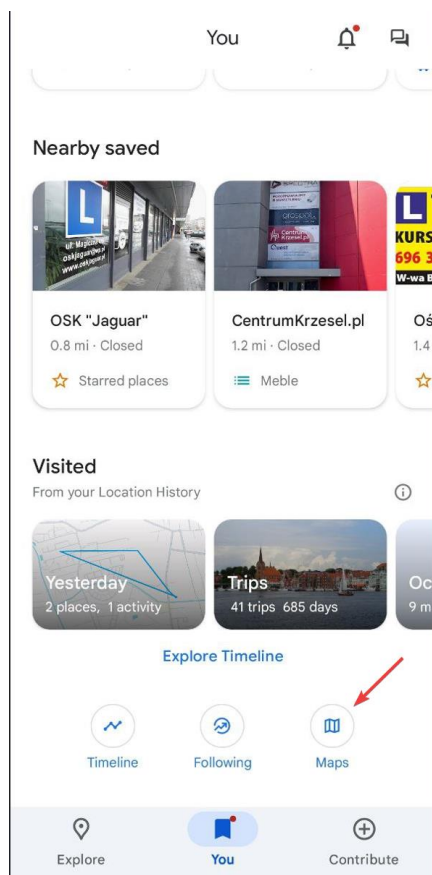

Step 4: Save the map

- Give name for your map and save it.

Step 5: Open created map in Google Maps

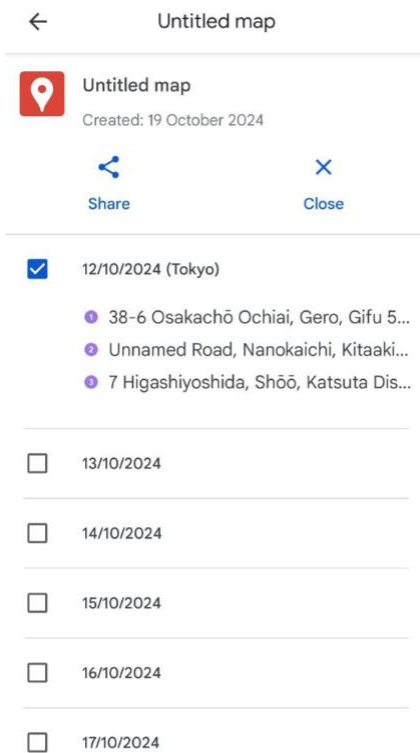

- Open Google Maps on your phone;
- Go to 'You' tab and scroll to bottom, then click on 'Maps';

- Open recently created map, and you will see markers;

- In 'View map legend' you can disable markers by day;

- To remove markers entirely, click 'Close' in map legend.
